

## Heavy Melting Scrap HMS 1&2 (80:20)

HMS 1&2 80:20 mixed heavy melting scrap prepared for induction and EAF melting.

### Classification

|            |                                  |
|------------|----------------------------------|
| ISRI code: | HMS 1 & 2 (80:20)                |
| HS code:   | 7204.49                          |
| Purity:    | Carbon steel, min 6 mm thickness |
| Origin:    | European Union                   |

### Typical chemistry

|     |           |
|-----|-----------|
| Fe: | "e 92 %   |
| C:  | "d 0.5 %  |
| S:  | "d 0.05 % |
| P:  | "d 0.05 % |

### Physical & commercial

|                    |                                                             |
|--------------------|-------------------------------------------------------------|
| Physical form:     | HMS1 "e 6 mm thickness "d 1.5 x 0.5 m; HMS2 "e 3 mm — 80:20 |
| Packaging:         | Loose, gas-cut to size                                      |
| Container loading: | 20'GP 25–27 MT · Break-bulk 3,000+ MT                       |
| MOQ:               | 25 MT (container) · 3,000 MT (break-bulk)                   |
| Inspection:        | SGS / BV / Intertek / CCIC                                  |
| Incoterms:         | CIF, CFR, FOB Rotterdam, break-bulk FOB                     |
| Payment terms:     | 30% TT + 70% LC at sight                                    |

### Typical applications

- Rebar / TMT bar remelt
- Structural steel remelt
